JASIS
JOURNAL OF THE AMERICAN SOCIETY FOR INFORMATION SCIENCE

Subject Index to Volume 44

Abstracting. *See* **Automatic Abstracting**

Acknowledgments
accounting for influence: acknowledgments in contemporary sociology, 406–412
acknowledgments and intellectual indebtedness: a bibliometric conjecture, 590–592

Acquisitions. *See* **Collection Development**

Aliasing
all the right descriptors: a test of the strategy of unlimited aliasing, 137–147

Art History Information Program
a profile of end-user searching behavior by humanities scholars: the Getty Online Searching Project Report No. 2, 273–291

AT&T Bell Laboratory Library Network
the RightPages™ service: an image-based electronic library, 446–452

Audiovisual Documents
a method for automatically abstracting visual documents, 40–56

Automatic Abstracting
a method for automatically abstracting visual documents, 40–56

Automatic Indexing
Belief Function Model for information retrieval, 10–18
Chinese text segmentation for text retrieval: achievements and problems, 532–542
comparing the document representation of two IR-systems: CLARIT and TOPIC, 383–392
data compression in full-text retrieval systems, 508–531
incomplete sentence quotations in books and journals, 398–405
KeyWords Plus™—algorithmic derivative indexing, 298–299
machine aided indexing [letter to the editor], 430
stemming of French words based on grammatical categories, 1–9

Belief Function Model
Belief Function Model for information retrieval, 10–18

Beliefs
on the existence of Mikhailov, 588–589

Bibliometrics
accounting for influence: acknowledgments in contemporary sociology, 406–412
acknowledgments and intellectual indebtedness: a bibliometric conjecture, 590–592
citation analysis of *Geochimica et Cosmochimica Acta*, 1951-1960, 322–326
obsolescence of music literature, 101–112

Bibliometrics ***(Continued)***
questionable validity of Poisson assumptions in a combined loglinear/MDS mapping model, 57–59
semantic relationships between cited and citing articles in library and information science journals, 543–552
the validity of Poisson assumptions in a combined loglinear/MDS mapping model, 175–178

Biological Databases
market pressure and government intervention in the administration and development of molecular databases, 28–39

Biomedical Literature
a decision model for technical journal deselection with an experiment in biomedical communications, 148–160

Book Collection. *See* **Collection Development**

Book Reviews
Automated Information Retrieval in Libraries: A Management Handbook, 428–429
Automated Support to Indexing, 119–121
Classification Research for Knowledge Representation and Organization: Proceedings of the 5th International Study Conference on Classification Research, 593–595
Critical Issues in the Information Age, 113
Depository Library Use of Technology: A Practitioner's Perspective, 595
The Emerging Worldwide Electronic University, 300–301
Envisioning Information, 212
Hypertext in Context, 115–116
Information Retrieval Interaction, 303–304
Language and Representation in Information Retrieval, 116–117
Libraries and Expert Systems, 302–303
Library Orthodoxies: A Decade of Change, 365
The Management of College and University Archives, 179–180
Managing Institutional Archives: Foundational Principles and Practices, 428
The Measurement and Evaluation of Library Service (2nd Ed.), 300
Online Information Hunting, 365–367
The Reconfigured Eye: Visual Truth in the Post-Photographic Era, 553
Subject Analysis in Online Catalogs, 593
Subject Indexing: An Introductory Guide, 117–119
Text Retrieval: Information First, 113–115
Vocabulary Control and Search Strategies in Online Searching, 121

Book Reviews ***(Continued)***
Without Consent: The Ethics of Disclosing Personal Information in Public Archives, 179–180

Boolean Logic
a fuzzy linguistic approach generalizing Boolean information retrieval: a model and its evaluation, 70–82
a graphical filter/flow representation of Boolean queries: a prototype implementation and evaluation, 327–339
PBS: an economical natural language query interpreter, 265–272
a profile of end-user searching behavior by humanities scholars: the Getty Online Searching Project Report No. 2, 273–291

Bradford's Law
[letter to the editor], 181–182
why has Bradford's law been an elusive phenomenon so far? [letter to the editor], 182–183

Budgeting
implementation and testing of a decision support system for public library materials acquisition budgeting, 83–93
using data from computerized circulation and cataloging systems for management decision making in public libraries, 94–100

Business Environment
environmental scanning by CEOs in two Canadian industries, 194–203

Canada
environmental scanning by CEOs in two Canadian industries, 194–203

CD-ROM Publications
data compression in full-text retrieval systems, 508–531
knowledge utilization: the role of new communication technologies, 222–234
publishing over the next decade, 474–479

Chaos Theory
the evaluation of knowledge utilization: placebo and nonspecific effects, dynamical systems, and chaos theory, 235–241

Chief Executive Officers
environmental scanning by CEOs in two Canadian industries, 194–203

Children
children's information retrieval behavior: a case analysis of an OPAC, 245–264

Chinese
Chinese text segmentation for text retrieval: achievements and problems, 532–542

Circulation Data
implementation and testing of a decision support system for public library materials acquisition budgeting, 83–93
using data from computerized circulation and cataloging systems for management decision making in public libraries, 94–100

Citation Analysis. *See* **Bibliometrics**

Citation Indexing
KeyWords Plus™—algorithmic derivative indexing, 298–299
semantic relationships between cited and citing articles in library and information science journals, 543–552

CLARIT
comparing the document representation of two IR-systems: CLARIT and TOPIC, 383–392

Classification
deductive information retrieval based on classifications, 557–578

Cognitive Organization
attending to cognitive organization in the design of computer menus: a two-experiment study, 393–397

Collection Development
a decision model for technical journal deselection with an experiment in biomedical communications, 148–160
implementation and testing of a decision support system for public library materials acquisition budgeting, 83–93
using data from computerized circulation and cataloging systems for management decision making in public libraries, 94–100

Communication
accounting for influence: acknowledgments in contemporary sociology, 406–412
acknowledgments and intellectual indebtedness: a bibliometric conjecture, 590–592
communication efficiency in research and development, 376–382
Shannon revisited: information in terms of uncertainty, 204–211

Communication Technology
knowledge utilization: the role of new communication technologies, 222–234
new communication technology provides perspective on knowledge utilization concept in social science, 229–230

Compression of Data. *See* **Data Compression**

Computer Science Literature
users, user interfaces, and objects: Envision, a digital library, 480–491

Computers. *See* **Personal Computers; Software**

Conference Proceedings
the impact of proceedings upon authors and journals [letter to the editor], 183

Copyright
the impact of proceedings upon authors and journals [letter to the editor], 183

Copyright *(Continued)*
market pressure and government intervention in the administration and development of molecular databases, 28–39
publishing over the next decade, 474–479
the RightPages™ service: an image-based electronic library, 446–452
toward an electronic copyright management system, 468–473
writing and literary work in copyright: a binational and historical analysis, 307–321

Corporations
environmental scanning by CEOs in two Canadian industries, 194–203

Current Awareness Systems
distilling information from text: the EDS *TemplateFiller* System, 493–507
the RightPages™ service: an image-based electronic library, 446–452

Data Compression
data compression in full-text retrieval systems, 508–531

Databases. *See* **Online Databases**

Decision Making
the average decision maker and its properties utilizing the generalized information system model, 352–363
environmental scanning by CEOs in two Canadian industries, 194–203

Decision Support System
a decision model for technical journal deselection with an experiment in biomedical communications, 148–160
implementation and testing of a decision support system for public library materials acquisition budgeting, 83–93

Deductive Information Retrieval
deductive information retrieval based on classifications, 557–578

Derivative Indexing. *See also* **Automatic Indexing**
KeyWords Plus™—algorithmic derivative indexing, 298–299

Descriptors. *See* **Index Terms**

Deselection of Journals
a decision model for technical journal deselection with an experiment in biomedical communications, 148–160

Dialog Information Services, Inc. (DIALOG)
effects of search experience and subject knowledge on the search tactics of novice and experienced searchers, 161–174
a profile of end-user searching behavior by humanities scholars: the Getty Online Searching Project Report No. 2, 273–291

Digital Libraries. *See* **Electronic Libraries**

Dissemination of Knowledge. *See* **Knowledge Utilization**

Distributed Information Servers. *See* **Wide Area Information Servers (WAIS)**

Document Representation
on the delusiveness of adopting a common space for modeling IR objects: are queries documents?, 579–587
users, user interfaces, and objects: Envision, a digital library, 480–491

Document Retrieval. *See* **Information Retrieval**

Dynamical System Analysis
the evaluation of knowledge utilization: placebo and nonspecific effects, dynamical systems, and chaos theory, 235–241

EDS *TemplateFiller* System
distilling information from text: the EDS *TemplateFiller* System, 493–507

Edwin Smith Surgical Papyrus
locating information in an Egyptian text of the 17th century B.C., 292–297

Efficiency
communication efficiency in research and development, 376–382

Egyptian Manuscripts
locating information in an Egyptian text of the 17th century B.C., 292–297

Eighty/Twenty (80/20) Rule
exact probabilistic and mathematical proofs of the relation between the mean μ and the generalized 80/20-rule, 369–375

Electronic Libraries
interfaces for distributed systems of information servers, 453–467
perspectives on digital libraries [introduction], 441–445
publishing over the next decade, 474–479
the RightPages™ service: an image-based electronic library, 446–452
toward an electronic copyright management system, 468–473
users, user interfaces, and objects: Envision, a digital library, 480–491

Electronic Publishing
publishing over the next decade, 474–479

End-User Searchers. *See also* **Searching**
a profile of end-user searching behavior by humanities scholars: the Getty Online Searching Project Report No. 2, 273–291

Entropy
Shannon revisited: information in terms of uncertainty, 204–211

Environmental Scanning
environmental scanning by CEOs in two Canadian industries, 194–203

Envision. *See* **Project Envision**

ERIC Database
all the right descriptors: a test of the strategy of unlimited aliasing, 137–147
effects of search experience and subject knowledge on the search tactics of novice and experienced searchers, 161–174

Expert Systems
an expert system for automatic query reformation, 124–136

Feedback in Information Retrieval Systems
multiversion information retrieval systems and feedback with mechanism of selection, 19–27

Film. ***See*** **Visual Documents**

Filter/Flow Representation
a graphical filter/flow representation of Boolean queries: a prototype implementation and evaluation, 327–339

Filters
distilling information from text: the EDS *TemplateFiller* System, 493–507
publishing over the next decade, 474–479

French
stemming of French words based on grammatical categories, 1–9

Front-End Systems and Software. ***See also*** **User Interfaces**
PBS: an economical natural language query interpreter, 265–272

Full-Text Retrieval
data compression in full-text retrieval systems, 508–531
an expert system for automatic query reformation, 124–136

Fuzzy Linguistic Model
a fuzzy linguistic approach generalizing Boolean information retrieval: a model and its evaluation, 70–82

Generalized Inverse Gaussian-Poisson (GIGP) Model
yes, the GIGP really does work—and is workable!, 61–69

Geochimica et Cosmochimica Acta
citation analysis of *Geochimica et Cosmochimica Acta*, 1951-1960, 322–326

Getty Art History Information Program
a profile of end-user searching behavior by humanities scholars: the Getty Online Searching Project Report No. 2, 273–291

GIGP. ***See*** **Generalized Inverse-Gaussian Poisson (GIGP) Model**

Government
market pressure and government intervention in the administration and development of molecular databases, 28–39

Graphical Information
a method for automatically abstracting visual documents, 40–56
the RightPages™ service: an image-based electronic library, 446–452

Graphical Representation
attending to cognitive organization in the design of computer menus: a two-experiment study, 393–397
a graphical filter/flow representation of Boolean queries: a prototype implementation and evaluation, 327–339

GWAIS. ***See*** **Wide Area Information Servers (WAIS)**

Health Services
information alchemy: transforming information through knowledge utilization, 217–221

Hellprin, Laurence B.
in memoriam, 555–556

Human Genome Project
market pressure and government intervention in the administration and development of molecular databases, 28–39

Humanities
a profile of end-user searching behavior by humanities scholars: the Getty Online Searching Project Report No. 2, 273–291

Hypergeometric Probability Distribution
retrieval testing with hypergeometric document models, 340–351

Hypertext
Markov models of search state patterns in a hypertext information retrieval system, 413–427
Russian experience in hypertext: automatic compiling of coherent texts, 185–193

Images. ***See*** **Graphical Information**

Index Terms. ***See also*** **Thesauri**
all the right descriptors: a test of the strategy of unlimited aliasing, 137–147
children's information retrieval behavior: a case analysis of an OPAC, 245–264
a probabilistic method for computing term-by-term relationships, 431–439
a profile of end-user searching behavior by humanities scholars: the Getty Online Searching Project Report No. 2, 273–291
semantic relationships between cited and citing articles in library and information science journals, 543–552

Indexes
data compression in full-text retrieval systems, 508–531
lack of indexes in works on information science, 364

Indexing. ***See*** **Automatic Indexing; Citation Indexing**

Information Retrieval. ***See also*** **Searching; Text Storage and Retrieval Systems**
Belief Function Model for information retrieval, 10–18
children's information retrieval behavior: a case analysis of an OPAC, 245–264
comparing the document representation of two IR-systems: CLARIT and TOPIC, 383–392
deductive information retrieval based on classifications, 557–578
on the delusiveness of adopting a common space for modeling IR objects: are queries documents?, 579–587
effects of search experience and subject knowledge on the search tactics of novice and experienced searchers, 161–174
an expert system for automatic query reformation, 124–136

[cover changes (editorial)], 123

Journal Productivity Distribution
[letter to the editor], 181–182
why has Bradford's law been an elusive phenomenon so far? [letter to the editor], 182–183

KeyWords Plus™
KeyWords Plus™—algorithmic derivative indexing, 298–299

Knowledge Representation
Russian experience in hypertext: automatic compiling of coherent texts, 185–193
users, user interfaces, and objects: Envision, a digital library, 480–491

Knowledge Utilization
communication efficiency in research and development, 376–382
the evaluation of knowledge utilization: placebo and nonspecific effects, dynamical systems, and chaos theory, 235–241
information alchemy: transforming information through knowledge utilization, 217–221
knowledge utilization: the role of new communication technologies, 222–234
perspectives on knowledge utilization [introduction], 215

Library and Information Science Abstracts. *See* **LISA Database**

Library Management
implementation and testing of a decision support system for public library materials acquisition budgeting, 83–93
using data from computerized circulation and cataloging systems for management decision making in public libraries, 94–100

Linear Programming
implementation and testing of a decision support system for public library materials acquisition budgeting, 83–93
using data from computerized circulation and cataloging systems for management decision making in public libraries, 94–100

Linguistics
Chinese text segmentation for text retrieval: achievements and problems, 532–542
distilling information from text: the EDS *TemplateFiller* System, 493–507
incomplete sentence quotations in books and journals, 398–405
Russian experience in hypertext: automatic compiling of coherent texts, 185–193
stemming of French words based on grammatical categories, 1–9

LISA Database
all the right descriptors: a test of the strategy of unlimited aliasing, 137–147

Literary Works
writing and literary work in copyright: a binational and historical analysis, 307–321

Loglinear/MDS Modeling
questionable validity of Poisson assumptions in a combined loglinear/MDS mapping model, 57–59
the validity of Poisson assumptions in a combined loglinear/MDS mapping model, 175–178

Managers
environmental scanning by CEOs in two Canadian industries, 194–203

Marketing
market pressure and government intervention in the administration and development of molecular databases, 28–39
publishing over the next decade, 474–479

Markov Model
Markov models of search state patterns in a hypertext information retrieval system, 413–427

Mathematical Proofs
exact probabilistic and mathematical proofs of the relation between the mean μ and the generalized 80/20-rule, 369–375

Menus (Software). *See* **User Interfaces**

Message Understanding (MUC)
distilling information from text: the EDS *TemplateFiller* System, 493–507

MICROARRAS
an expert system for automatic query reformation, 124–136

Mikhailov, A. I.
on the existence of Mikhailov, 588–589

Models and Modeling. *See also* **specific models**
acknowledgments and intellectual indebtedness: a bibliometric conjecture, 590–592
the average decision maker and its properties utilizing the generalized information system model, 352–363
on the delusiveness of adopting a common space for modeling IR objects: are queries documents?, 579–587
retrieval testing with hypergeometric document models, 340–351

Molecular Databases
market pressure and government intervention in the administration and development of molecular databases, 28–39

Multimedia
new communication technology provides perspective on knowledge utilization concept in social science, 229–230

Multiversion Information Retrieval Systems
multiversion information retrieval systems and feedback with mechanism of selection, 19–27

Music Literature
obsolescence of music literature, 101–112

Name-Matching Algorithms
[letter to the editor], 213

Natural Language Processing
distilling information from text: the EDS *TemplateFiller* System, 493–507

Natural Language Queries
PBS: an economical natural language query interpreter, 265–272

Nonspecific Effects
the evaluation of knowledge utilization: placebo and nonspecific effects, dynamical systems, and chaos theory, 235–241

OAK II
PBS: an economical natural language query interpreter, 265–272

Object Orientation
users, user interfaces, and objects: Envision, a digital library, 480–491

Observational Abilities
on the existence of Mikhailov, 588–589

Obsolescence of Literature
obsolescence of music literature, 101–112

Online Databases
deductive information retrieval based on classifications, 557–578
knowledge utilization: the role of new communication technologies, 222–234
new communication technology provides perspective on knowledge utilization concept in social science, 229–230
a profile of end-user searching behavior by humanities scholars: the Getty Online Searching Project Report No. 2, 273–291

Online Public Access Catalogs (OPAC)
children's information retrieval behavior: a case analysis of an OPAC, 245–264

Optical Character Recognition
the RightPages™ service: an image-based electronic library, 446–452

Papyri
locating information in an Egyptian text of the 17th century B.C., 292–297

Patents
market pressure and government intervention in the administration and development of molecular databases, 28–39

PBS (Parsing, Boolean Recognition, Stemming)
PBS: an economical natural language query interpreter, 265–272

Personal Computers
new communication technology provides perspective on knowledge utilization concept in social science, 229–230

Placebo Effect
the evaluation of knowledge utilization: placebo and nonspecific effects, dynamical systems, and chaos theory, 235–241

Poisson Model
questionable validity of Poisson assumptions in a combined loglinear/MDS mapping model, 57–59
the validity of Poisson assumptions in a combined loglinear/MDS mapping model, 175–178
yes, the GIGP really does work—and is workable!, 61–69

Private Industry
market pressure and government intervention in the administration and development of molecular databases, 28–39

Probabilistic Retrieval Systems
exact probabilistic and mathematical proofs of the relation between the mean μ and the generalized 80/20-rule, 369–375
a probabilistic method for computing term-by-term relationships, 431–439

Probability Models
retrieval testing with hypergeometric document models, 340–351

Proceedings
the impact of proceedings upon authors and journals [letter to the editor], 183

Project Envision
users, user interfaces, and objects: Envision, a digital library, 480–491

Public Libraries
implementation and testing of a decision support system for public library materials acquisition budgeting, 83–93
using data from computerized circulation and cataloging systems for management decision making in public libraries, 94–100

Publishing. *See* **Electronic Publishing**

Quattro Pro Software
implementation and testing of a decision support system for public library materials acquisition budgeting, 83–93

Queries
on the delusiveness of adopting a common space for modeling IR objects: are queries documents?, 579–587

Query Formulation
children's information retrieval behavior: a case analysis of an OPAC, 245–264
an expert system for automatic query reformation, 124–136
a fuzzy linguistic approach generalizing Boolean information retrieval: a model and its evaluation, 70–82
a graphical filter/flow representation of Boolean queries: a prototype implementation and evaluation, 327–339
multiversion information retrieval systems and feedback with mechanism of selection, 19–27
PBS: an economical natural language query interpreter, 265–272

Quotations
incomplete sentence quotations in books and journals, 398–405

Red Ink
locating information in an Egyptian text of the 17th century B.C., 292–297

Relevance
a fuzzy linguistic approach generalizing Boolean information retrieval: a model and its evaluation, 70–82
retrieval testing with hypergeometric document models, 340–351
semantic relationships between cited and citing articles in library and information science journals, 543–552

Videotapes. ***See*** **Visual Documents**

Virtual National Digital Library (VNDL)
perspectives on digital libraries [introduction], 441–445

Visual Documents
a method for automatically abstracting visual documents, 40–56

WAIS. ***See*** **Wide Area Information Servers (WAIS)**

Weighted Information Retrieval
a fuzzy linguistic approach generalizing Boolean information retrieval: a model and its evaluation, 70–82

Wide Area Information Servers (WAIS)
interfaces for distributed systems of information servers, 446–452

Word Clustering
[letters to the editor], 213

Writing
writing and literary work in copyright: a bi-national and historical analysis, 307–321

XWAIS. ***See*** **Wide Area Information Servers (WAIS)**

Zero-Truncated Informetric Data Sets
yes, the GIGP really does work—and is workable!, 61–69

JASIS
JOURNAL OF THE AMERICAN SOCIETY FOR INFORMATION SCIENCE

Author Index to Volume 44

Arnold, James Q.
The RightPages™ Service: an image-based electronic library, 446–452
Auster, Ethel
[book review], 428–429
environmental scanning by CEOs in two Canadian industries, 194–203

Backer, Thomas E.
information alchemy: transforming information through knowledge utilization, 217–221
Bao, Dachun
a decision model for technical journal deselection with an experiment in biomedical communications, 148–160
Bates, Marcia J.
a profile of end-user searching behavior by humanities scholars: the Getty Online Searching Project report no. 2, 273–291
Batty, David
[book review], 593–595
Bearman, Toni Carbo
[book review], 365
Bell, Timothy C.
data compression in full-text retrieval systems, 508–531
Blair, David C.
[book review], 113–115
Bollmann-Sdorra, Peter
on the delusiveness of adopting a common space for modeling IR objects: are queries documents?, 579–587
Bordogna, Gloria
a fuzzy linguistic approach generalizing Boolean information retrieval: a model and its evaluation, 70–82
Borko, Harold
[book review], 113
Brooks, Terrence A.
all the right descriptors: a test of the strategy of unlimited aliasing, 137–147
[book review], 303–304
Brueni, Dennis J.
users, user interfaces, and objects: Envision, a digital library, 480–491
Burrell, Quentin L.
[letter to the editor], 181
yes, the GIGP really does work—and is workable!, 61–69

Chignell, Mark
[book review], 115–116
Choo, Chun Wei
environmental scanning by CEOs in two Canadian industries, 194–203
Cole, Charles
Shannon revisited: information in terms of uncertainty, 204–211
Coll, Joan H.
attending to cognitive organization in the design of computer menus: a two-experiment study, 393–397
Coll, Richard
attending to cognitive organization in the design of computer menus: a two-experiment study, 393–397
Conway, Paul
[book review], 428
Corley, Jamil
distilling information from text: the EDS *TemplateFiller* system, 493–507
Cox, Richard J.
[book review], 179–180
Cronin, Blaise
accounting for influence: acknowledgments in contemporary sociology, 406–412
acknowledgments and intellectual indebtedness: a bibliometric conjecture, 590–592
Curran, John
interfaces for distributed systems of information servers, 453–467
Currás, Emilia
[letter to the editor], 430

Davis, Charles H.
acknowledgments and intellectual indebtedness: a bibliometric conjecture, 590–592
Debons, Anthony
in memoriam: Laurence B. Heilprin, 1906–1993 (addendum), 555
Diodato, Virgil
obsolescence of music literature, 101–112

Egghe, L.
exact probabilistic and mathematical proofs of the relation between the mean μ and the generalized 80/20-rule, 369–375
Erickson, Thomas
interfaces for distributed systems of information servers, 453–467
Everett, James E.
the validity of Poisson assumptions in a combined loglinear/MDS mapping model, 175–178

Fenton, Michael R.
yes, the GIGP really does work—and is workable!, 61–69
Fox, Edward A.
perspectives on digital libraries [introduction], 441–445
users, user interfaces, and objects: Envision, a digital library, 480–491
Frants, Valery I.
multiversion information retrieval systems and feedback with mechanism of selection, 19–27

Garfield, Eugene
KeyWords Plus™—algorithmic derivative indexing, 298–299
Garrett, John R.
toward an electronic copyright management system, 468–473
Gauch, Susan
an expert system for automatic query reformation, 124–136
Gilyarevskii, R. S.
Russian experience in hypertext: automatic compiling of coherent texts, 185–193
Gleason, John M.
questionable validity of Poisson assumptions in a combined loglinear/MDS mapping model, 57–59
Gleeson, Michael E.
implementation and testing of a decision support system for public library materials acquisition budgeting, 83–93
using data from computerized circulation and cataloging systems for management decision making in public libraries, 94–100
Goldman, Jonathan
interfaces for distributed systems of information servers, 453–467

Harmon, Glynn
[book review], 302–303
Harter, Stephen P.
[letter to the editor], 213
semantic relationships between cited and citing articles in library and information science journals, 543–552
Hass, Stephanie W.
incomplete sentence quotations in books and journals, 398–405
Heath, Lenwood S.
users, user interfaces, and objects: Envision, a digital library, 480–491
Hix, Deborah
users, user interfaces, and objects: Envision, a digital library, 480–491

Hoffman, Mella M.
The RightPages™ Service: an image-based electronic library, 446–452

Horrocks, Norman
[letter to the editor], 213

Hsieh-Yee, Ingrid
effects of search experience and subject knowledge on the search tactics of novice and experienced searchers, 161–174

Humphrey, Pete
distilling information from text: the EDS *TemplateFiller* system, 493–507

Järvelin, Kalervo
deductive information retrieval based on classifications, 557–578

Kahle, Brewster
interfaces for distributed systems of information servers, 453–467

Kilgour, Frederick G.
lack of indexes in works on information sciences, 364
locating information in an Egyptian text of the 17th century B.C., 292–297

Kiresuk, Thomas J.
the evaluation of knowledge utilization: placebo and nonspecific effects, dynamical systems and chaos theory, 235–241

Kleyle, Robert M.
the average decision maker and it properties utilizing the generalized information system model, 352–363

Koenig, Michael E. D.
on the existence of Mikhailov, 588–589

Kraft, Donald H.
editorial, 123
in memoriam: Laurence B. Heilprin, 1906–1993 (editorial), 555–556

Lancaster, F. W.
[book review], 121

Lifshin, Arthur
citation analysis of *Geochimica et Cosmochimica Acta*, 1951–1960, 322–326

Lucey, John
[letter to the editor], 430

Lunin, Lois F.
perspectives on digital libraries [introduction], 441–445
perspectives on knowledge utilization [introduction], 215–216

Lyons, Patrice A.
toward an electronic copyright management system, 468–473

Macdonald, Nina H.
The RightPages™ Service: an image-based electronic library, 446–452

Macpherson, Melissa
distilling information from text: the EDS *TemplateFiller* system, 493–507

McKenzie, Gail
accounting for influence: acknowledgments in contemporary sociology, 406–412

Meadow, Charles T.
PBS: an economical natural language query interpreter, 265–272

Milidiú, Ruy Luiz
Belief Function Model for information retrieval, 10–18

Miller, Wendy
[book review], 212

Moffat, Alistair
data compression in full-text retrieval systems, 508–531

Morris, Harry
interfaces for distributed systems of information servers, 453–467

Murphy, Cynni
[book review], 553

Nandavar, Renuka
attending to cognitive organization in the design of computer menus: a two-experiment study, 393–397

Nevill-Manning, Craig G.
data compression in full-text retrieval systems, 508–531

Niemi, Timo
deductive information retrieval based on classifications, 557–578

Nisonger, Thomas E.
semantic relationships between cited and citing articles in library and information science journals, 543–552

Nowell, Lucy T.
users, user interfaces, and objects: Envision, a digital library, 480–491

O'Connor, Brian
[book review], 116–117

O'Gorman, Lawrence
The RightPages™ Service: an image-based electronic library, 446–452

Olulc-Vukovic, Vesna
why has Bradford's law been an elusive phenomenon so far? [letter to the editor], 182–183

Ottensmann, John R.
implementation and testing of a decision support system for public library materials acquisition budgeting, 83–93
using data from computerized circulation and cataloging systems for management decision making in public libraries, 94–100

Paijmans, Hans
comparing the document representations of two IR-systems: CLARIT and TOPIC, 383–392

Paisley, William
knowledge utilization: the role of new communication technologies, 222–234

Paisley, William (*Continued*)
new communication technology provides perspective on knowledge utilization concept *in social science*, 229–230
perspectives on knowledge utilization [introduction], 215–216

Papadakis, Emmanuel P.
the impact of proceedings upon authors and journals [letter to the editor], 183

Pasi, Gabriella
a fuzzy linguistic approach generalizing Boolean information retrieval: a model and its evaluation, 70–82

Pelton, Joseph
[book review], 300–301

Penniman, W. David
[book review], 300

Qiu, Liwen
Markov models of search state patterns in a hypertext information retrieval system, 413–427

Raghavan, Vijay V.
on the delusiveness of adopting a common space for modeling IR objects: are queries documents?, 579–587

Rao, Durgesh
users, user interfaces, and objects: Envision, a digital library, 480–491

Rawlins, Gregory J. E.
publishing over the next decade, 474–479

Roderer, Nancy
in memoriam: Laurence B. Heilprin, 1906–1993, 555

Rorvig, Mark E.
a method for automatically abstracting visual documents, 40–56

Rubio, Lourdes
accounting for influence: acknowledgments in contemporary sociology, 406–412

Ryan, Susan M.
[book review], 595

Salasin, Susan
perspectives on knowledge utilization [introduction], 215–216

Samstag-Schnock, Uwe
PBS: an economical natural language query interpreter, 265–272

Savoy, Jacques
stemming of French words based on grammatical categories, 1–9

Shapiro, Jacob
multiversion information retrieval systems and feedback with mechanism of selection, 19–27

Sher, Irving H.
KeyWords Plus™—algorithmic derivative indexing, 298–299

Shneiderman, Ben
a graphical filter/flow representation of Boolean queries: a prototype implementation and evaluation, 327–339

Shuldberg, H. Kelly
distilling information from text: the EDS *TemplateFiller* system, 493–507

Siegfried, Susan
a profile of end-user searching behavior by humanities scholars: the Getty Online Searching Project report no. 2, 273–291

Sillince, J. A. A.
market pressure and government intervention in the administration and development of molecular databases, 28–39

Sillince, M.
market pressure and government intervention in the administration and development of molecular databases, 28–39

Silva, Wagner Teixeira da
Belief Function Model for information retrieval, 10–18

Smith, Fran
obsolescence of music literature, 101–112

Smith, John B.
an expert system for automatic query reformation, 124–136

Solomon, Paul
children's information retrieval behavior: a case analysis of an OPAC, 245–264

Story, Guy A.
The RightPages™ Service: an image-based *electronic library*, 446–452

Subbotin, M. M.
Russian experience in hypertext: automatic compiling of coherent texts, 185–193

Tenopir, Carol
[book review], 365–367

Thom, James
[letter to the editor], 213

Triolo, Victor A.
a decision model for technical journal *dersselection with an experiment in* biomedical communications, 148–160

Tseng, Gwyneth
Chinese text segmentation for text retrieval: achievements and problems, 532–542

Vizine-Goetz, Diane
[book review], 593

Voiskunskii, Vladimir G.
multiversion information retrieval systems and feedback with mechanism of selection, 19–27

Wake, William C.
users, user interfaces, and objects: Envision, *a digital library*, 480–491

Warner, Julian
writing and literary work in copyright: a binational and historical analysis, 307–321

Weaver-Wozniak, Sherrill
accounting for influence: acknowledgments in contemporary sociology, 406–412

Weinberg, Bella Hass
[book review], 117–119, 119–121

Weng, Aiwei
semantic relationships between cited and citing articles in library and information *science journals*, 543–552

Wilbur, W. John
retrieval testing with hypergeometric document models, 340–351

Wilde, Deborah N.
a profile of end-user searching behavior by humanities scholars: the Getty Online Searching Project report no. 2, 273–291

Wilson, Patrick
communication efficiency in research and development, 376–382

Witten, Ian H.
data compression in full-text retrieval systems, 508–531

Wong, S. K. M.
a probabilistic method for computing term-by-term relationships, 431–439

Wu, Zimin
Chinese text segmentation for text retrieval: achievements and problems, 532–542

Yao, Y. Y.
a probabilistic method for computing term-by-term relationships, 431–439

Young, Degi
a graphical filter/flow representation of Boolean queries: a prototype implementation and evaluation, 327–339

Yovits, Marshall C.
the average decision maker and it properties utilizing the generalized information system model, 352–363

Zobel, Justin
data compression in full-text retrieval *systems*, 508–531
[letter to the editor], 213
